EDUCATION

Indiana University Bloomington

Bloomington, IN

Bachelor of Science - BS, Computer Science, Specialisation: Software Engineering

Awards: Scholarship for Grace Hopper Celebration 2024, and 2025, 2 x Excellence in Leadership Award (Spring 2025 and 2026), JP Morgan Chase SEP (Software Engineering Program) Participant - August 2026

TOOLS AND TECHNOLOGIES: Python | TypeScript | CI/CD | Java | AWS | PostgreSQL | HTML | CSS | Javascript | Docker | Git | C | Firebase | Swift | Postman | GCP | Langchain | Vector Databases | Pinecone | Linux | React | [Next.js](#) | Kubernetes | PostgreSQL | API Development | Stripe API | Open AI API | Node.js | Material UI | RISC-V | Agile Methodologies | Data Structures and Algorithms | MySQL | GraphQL | Ultra-Low Latency | C++ | Networks | MongoDB | Vercel | Latency p99

PROFESSIONAL EXPERIENCE

GlobalNOC Full Stack Software Engineer Intern

June 2025 - May 2026

- Developed and refined next-generation front-end application project, UI for GlobalNOC' clients, enhancing user experience through modern UI practices. Participated in **daily team stand-ups** to report progress, address blockers, and align on development priorities and team objectives in an operations-heavy engineering environment **for a year**.
- Wrote and **tested responsive UI code** using VSCode, standardized plugins, and integrated RESTful APIs to ensure seamless data flow and enhanced user experience; utilised grafana for data visualisation, and alertmon for monitoring servers.
- Developed internal libraries and deployment pipelines that automated environment validation, secrets handling, and access controls, **accelerating developer workflows** while reducing configuration-related production incidents.
- Developed full-stack internal tools including user-facing dashboards, backend services, and **CI/CD pipelines with secure coding practices**, accelerating workflows, enabling smoother paging incident resolution, while strengthening operational resilience.
- Utilised the **ServiceNow APIs, Table API, GlideRecord API** to create scripts to automate the data entry for the Web Apps
- Worked on tickets related to debugging production incidents, and feature flags, rollback mechanisms for other teams
- Utilised DevContainers and Kubernetes to implement blackbox testing for isolated segments of large backend codebases.

Headstarter AI Software Engineer Fellow

July 2024 - September 2024

- Built 5 AI projects in 7 weeks by collaborating with 3 teammates using Stripe API, OpenAI API, React, Typescript, Node.js
- Networked with engineers from Google, Meta, Amazon, venture-backed startups in weekly talks, sprints, mentor sessions

ConTracker Founder and Student Developer

January 2020 - October 2021

- Built ConTracker, an iOS proptech mobile app that tracks the construction of luxury homes. Created 25+ Wireframes, UML Diagrams, Structure, and 10+ Flowcharts for the app using Mockflow • Designed UI for mobile app using Sketch, and developed Front-end using Swift5 Back-end using Parse SDK and Cocoapods • Conducted user testing sessions with over 25 participants, gathering critical feedback that directly informed three significant app updates and resolved the top causes of application crashes prior to launch; Integrated the feature of remote push notifications (RPNs) into the iOS app

PROJECTS

RateMyProfessors ChatBot [Link](#)

August 2024 - August 2024

- Collaborated with three teammates to build a Chatbot that provides feedback, rating of professors, and suggests professors based on end-user/student needs using Javascript, Typescript and Next.js • Implemented the **GPT-4o-mini API keys**, Langchain and RAG • Utilised Pinecone vector database, and **Jupyter Notebooks** to store data, and on the backend, deployed via Vercel

Pantry Management [Link](#)

July 2024 - July 2024

- Utilized Firebase to store data on the backend, and deployed using Vercel • Implemented login functionality using GCP (Google Cloud Platform) to authenticate user credentials, to provide an individualized pantry items management system.

Flower Shop Project [Frontend](#) [Backend](#)

April 2024 - April 2024

- Developed Flower Shop, A **SpringBoot app** that enables users to purchase flowers with **25 distinct endpoints**
- Engineered Frontend using HTML, CSS, Javascript, and deployed Github Pages; **Utilized Postman** for JSON requests
- Produced backend using spring framework and spring boot application, and deployed on Render • Connected the database using Dbeaver; Integrated CI / CD ensuring **0 deployment errors across 9 iterations on frontend** • Coded user login and sign up functionality, and discount features, along with add/delete features for flowers in cart

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

INgineering at IU President

May 2023 - May 2026

- Spearheaded Third Edition of Luddy Hackathon in Fall 2024 with a 20+ executive board member team with 300+ registrants
- Managed long-term vision and operations, held biweekly meetings with Senior Advisors • Grew the club membership from 20+ members to 200+ members • Initiated semester-long partnership with a quantum computing club • Conducted Hackathons for four semesters in collaboration with 10 other clubs and oversaw 50+ events in **3 years of presidency**.

Indiana University, Luddy School of Informatics, Computing and Engineering

Bloomington, IN

Undergraduate Student Researcher

September 2022 - December 2022

- Employed computational techniques to analyze voter sentiments, predict fraud, and the spread of misinformation on social media during U.S Midterm Elections 2022 • Collaborated with researchers to compile a 90+ keyword list; estimated the prevalence of misinformation on the images gathered • Researched and Collected data from Twitter/X, and Meta to classify tweets, and images, and generated graphs using excel to assign credibility as high or low
