PROFESSIONAL EXPERIENCE

GlobalNOC Full Stack Software Engineer Intern

June 2025 - August 2026

- Developed and refined next-generation front-end application project, UI for GlobalNOC' clients, enhancing user experience through modern UI practices. Participated in weekly team stand-ups to report progress, address blockers, and align on development priorities and team objectives in an operations-heavy engineering environment.
- Wrote and tested responsive UI code using VSCode, standardized plugins, and integrated RESTful APIs to ensure seamless data flow and enhanced user experience; utilised grafana for data visualisation, and alertmon for monitoring servers.
- Developed internal libraries and deployment pipelines that automated environment validation, secrets handling, and access controls, accelerating developer workflows while reducing configuration-related production incidents.
- Developed full-stack internal tools including user-facing dashboards, backend services, and CI/CD pipelines with built-in security, accelerating workflows, enabling smoother paging incident resolution, while strengthening operational resilience.
- Utilised the ServiceNow APIs, Table API, GlideRecord API to create scripts to automate the data entry for the Web Apps
- Worked on tickets related to debugging production incidents, and feature flags, rollback mechanisms for other teams
- Utilised DevContainers and Kubernetes to implement blackbox testing for isolated segments of large backend codebases.

Headstarter AI Software Engineer Fellow

July 2024 - September 2024

- Built 5 AI projects in 7 weeks by collaborating with 3 teammates using Stripe API, OPEN AI API, and modern tech stack
- Networked with engineers from Google, Meta, Amazon, venture-backed startups in weekly talks, sprints, mentor sessions

ConTracker Founder and Student Developer

January 2020 - October 2021

- Built ConTracker, an iOS proptech mobile app that tracks the construction of luxury homes. Created 25+ Wireframes, UML Diagrams, Structure, and 10+ Flowcharts for the app using Mockflow
- Designed UI for mobile app using Sketch, and developed Front-end using Swift5; Back-end using parse and cocoapods
- Conducted user testing sessions with over 25 participants, gathering critical feedback that directly informed three significant app updates and resolved the top causes of application crashes prior to launch; Integrated the feature of remote push notifications (RPNs) into the app

PROJECTS

RateMyProfessors ChatBot [Link](#)

August 2024 - August 2024

- Collaborated with three teammates to build a Chatbot that provides feedback, rating of professors, and suggests professors based on end-user/student needs using Javascript, Typescript and Next.js
- Implemented the GPT-4o-mini API keys, Langchain and RAG
- Utilised Pinecone, a vector database, and Jupyter Notebooks to store data, and on the backend, deployed via Vercel
- Used Material UI for UI design.

Pantry Management [Link](#)

July 2024 - July 2024

- Utilized Firebase to store data on the backend, and deployed using Vercel
- Implemented login functionality using GCP (Google Cloud Platform) to authenticate user credentials, to provide an individualized pantry items management system.

Flower Shop Project [Frontend](#) [Backend](#)

April 2024 - April 2024

- Developed Flower Shop, A SpringBoot based web app that enables users to purchase flowers with 25 distinct endpoints
- Engineered Frontend using HTML, CSS, Javascript, and deployed Github Pages; Utilized Postman to send JSON API requests
- Produced backend using spring framework and spring boot application, and deployed on Render
- Connected the database using Dbeaver; Integrated CI / CD ensuring 0 deployment errors across 9 iterations on frontend
- Coded user login and sign up functionality, and discount features, along with add/delete features for flowers in cart

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Engineering at IU President

May 2023 - May 2026

- Spearheaded Third Edition of Luddy Hackathon in Fall 2024 with a 20+ executive board member team with 300+ registrants
- Managed long-term vision and operations, held biweekly meetings with Senior Advisors
- Grew the club membership from 20+ members to 200+ members
- Initiated semester-long partnership with a quantum computing club
- Conducted Hackathons for four semesters in collaboration with 10 other clubs and oversaw 50+ events in 3 years of presidency.

Indiana University, Luddy School of Informatics, Computing and Engineering

Bloomington, IN

Undergraduate Student Researcher

September 2022 - December 2022

- Employed computational techniques to analyze voter sentiments, predict fraud, and the spread of misinformation on social media during U.S Midterm Elections 2022
- Collaborated with researchers to compile a 90+ keyword list; estimated the prevalence of misinformation on the images gathered
- Researched and Collected data from Twitter/X, and Meta to classify tweets, and images, and generated graphs using excel to assign credibility as high or low

EDUCATION

Indiana University Bloomington

Bloomington, IN

Bachelor of Science - BS, Computer Science,

Honors and Awards: Awarded \$2000 Scholarship for Grace Hopper Celebration 2024, Awarded \$2000 Scholarship for Grace Hopper Celebration 2025, Certificate of Academic Excellence (Spring 2026), Certificate of Academic Excellence (Spring 2025), Selected to represent IU for SWE 2024 Conference (top 50 out of 2000+ applicants)
